Security & Compliance

Commitment to our Customers

Your compliance and security needs are our priority.

At CHEQ, we take great care in implementing and maintaining the security of our services and your data. We employ industry standard procedures and policies to ensure the safety of your data and prevent unauthorized use of any such information.

Your Information is Secure

ISO 27001 and SOC2.

CHEQ is ISO 27001certified. We are targeting SOC 2 compliance to be certified in Q3 2022.

Data access and storage.

CHEQ ensures all data is stored, processed and hosted on SOC2 compliant AWS data centers.

Your Privacy Practice is Protected

CHEQ abides by GDPR, CCPA and related regulations.

None of the CHEQ products require access to information that directly identifies end users accessing your site. CHEQ is a 'Processor' under the GDPR and a 'Service Provider' under the CCPA. In its capacity as such, CHEQ processes personal data it collects only as necessary to provide its services to the applicable CHEQ customer who authorized the collection of such data.

Your Customer's Site Experience is Unaltered

CHEQ's Asynchronous Tags don't affect site performance.

The CHEQ JavaScript tag is designed to be a seamless addition to your website, adding no latency or discernable impact on the user experience. As an asynchronous tag that loads in parallel to your website, it does not block or delay the rendering of the page.
